

LR/LM - SERIES

MANUAL TORQUE WRENCHES

Wrench clicks and momentarily release, when set torque is reached, Resulting in fast and efficient operation.

The -45tooth reversible ratchet head results in both clockwise and Counter clockwise, fine increment operation.

Dual scale reading- imperial and metric.

Rubber grip(LR), Metal grip (LM).

LIFTON

Hydraulic Power Systems

+/- %4 Accuracy in clockwise, direction exceeds specifications.

Ergonomic soft grips are comfortable to use.

Lock Knob secures selected torque from accidental change.

Sturdy body construction ensures maximum durability. Comes with storage case.

Easy to read laser marked single scale dial is shock resistant and protected by a tough metal guard.

Memory needle retains highest torque reading applied. Calibrated in both CW and CCW direction.

Accuracy: +/- 3% of indicated value, CW & CCW, from 20% to 100% of full scale.

Individually serialized with matching certificate of calibration.

Torque Units: ft.lb, Nm.

Audible (tone) preset alerts.

Comfortable non-slip grip handle.

Sealed Ratchet Head.

LED blinking for visual notifications.

Accuracy +/- 2% CW and +/- 3% CCW of readings from 20% to 100% of full scale.

Storage Temperature: 0 - 122° F (-20 - 50° C).

Humidity up to 90% non-condensing

Certificate of traceability for 20% to 100% of full scale. Includes storage case.

LIW - SERIES

PNEUMATIC IMPACT WRENCH

Lifton offers industrial impact wrenches with various drive sizes and torque outputs.

Light weight and ergonomic design makes the tool easy to handle.

Suitable for opening and tightening of nuts and bolts.

Widely used in structural steel erections, marine industry, pipeline, automobile industry etc.

Air flow of 25 cfm, required at 6.3 bar.

The LTM Series is heavy duty model multipliers with wide range of torque capacity.

Models are available in 6 different models and with repeatable accuracy of %5.

All LTM series models are equipped with shift pins to change the direction.

(Model FCF-142 & MCM-142)

Compact, low weight and high strength designs.

The °360 x °180 Swivel couplers help to position the tool easily.

One power head is suitable for different sizes of ratchet links.

Low neck, short height and small radius make it accessible at difficult bolting areas.

700 Bar maximum working pressure.

Consistent torque output.

Easy fixing and removal of ratchet links.
